

Your Learning Portal Site Map

What is the Admin Dashboard?

A secure behind-the-scenes website to manage your learning portal. Your dashboard provides easy-to-use tools for you to upload new and changing content for your public portal, customize reporting, and manage mailing lists and email blasts. Or if you prefer, we will handle your content updates.

ADMIN DASHBOARD

What Do Public Users See?

Your website's front page and supporting pages. The front page includes news, activity descriptions, downloads and podcasts—it's up to you. Public users can browse the activity library but must register to access activities for credits. A system test allows users to check technical compatibility.

PUBLIC USERS

What Do Registered Users Receive?

A secure login for accessing interactive educational activities for CME credits. The system also maintains a complete personal history to track activities, post-tests, evaluation responses and certificates for each registered user. If e-commerce is enabled, users can access their transaction records.
